SCI-FI AAA UI PACK

Use Steps:
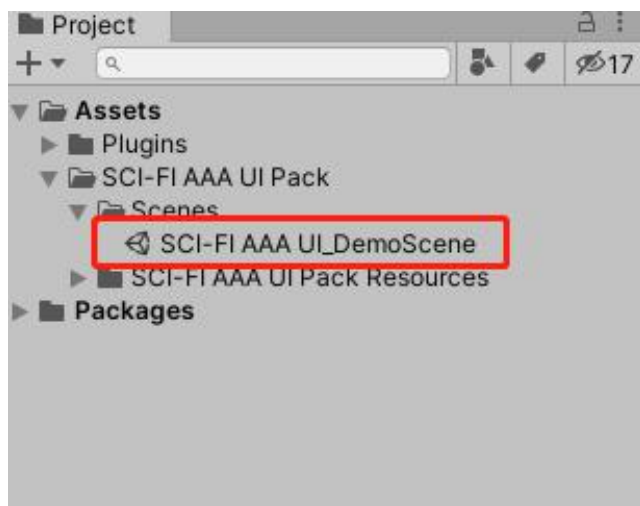

1.Check whether the canvas resolution is 2560 * 1440. If not, set it to this resolution to display all assets correctly

2. Open the following folder:

Project/Assets/SCI-FI AAA UI Pack/Scenes

There is 1 demo scene here. Select the scene and double-click it to open it

3. Double click the "play" button to start running the scene, so you can see the dynamic effect of the scene.

4. If you don't want to use the default scene directly, you can find the individual prefab you want to use in 'project / assets / SCI-FI AAA UI Pack resources / prefabs', and then drag it to your project scene.You can freely combine and use all the elements.
